

COUNTY OF YOLO

Health and Human Services Agency

Healthy Yolo: Chronic Disease Prevention Work Group

Agenda

Date & Time: July 19, 2018 8:30 – 10:30 am
Location: Gonzalez Building, Community Room, 25 N. Cottonwood St, Woodland
Attendees: Craig Blomberg, Sutter Davis; Ron Chapman, HHSA; Kellymarie Chen, HHSA; Haydee Dabritz; HHSA; Ashley Logins-Miller, HHSA; John McKean, Community member; Steve Jensen, HHSA; Emily Vaden, HHSA, Rebecca Tryon, HHSA; Brian Vaughn, HHSA

1) WELCOME & INTRODUCTIONS

- Emily welcomed the group, reviewed the agenda and introductions.
- Brian Vaughn is the new Public Health Director and Community Health Branch Director.
- Kellymarie Chen will be transitioning into the Community Health Branch to support the CHA, CHIP, etc.

2) DATA SHARING

- See Dashboard at www.HealthyYolo.org for updated data.
- **Harvest of the Month:** In the past, Harvest of the Month was a priority of CNAP. HHSA recently received a grant and will be expanding Harvest of the Month efforts. It was brought to Rebecca's attention that the Wellness Center provides a food distribution weekly and would possibly be interested in Harvest of the Month information.
- **Yolo Food Bank:** The Food Bank has new data and will be looking to adjusting their measures in the CHIP.
- **Actively Transporting to School:** Safe Routes to School was a 2 year grant that aimed at serving the 10 Woodland elementary and middle schools. The data for this effort was gathered from a pre and post survey. Although there was a great response to the pre survey, only one school completed the post survey. At this point, the grant is over and these measures can be removed from CHIP. Some of the other accomplishments of the grant include:
 - Walking and bike audits at all 10 schools which included representation from the City, policy department, transportation, parents, students, and principal. Due to these audits updated signs were install, crosswalks were re-striped, etc. Additionally, the city has put in about \$2 million in walkability and bike-ability in Woodland.
 - A detailed bike map of Woodland was created.
- **Tobacco rate sale:** With the legal age to purchase tobacco products changing to age 21, the program was expecting to see a decrease in illegal sale rates.
 - At this point, this data focuses on tobacco sales and does not include cannabis. There is not yet an ordinance in place for monitoring cannabis sales.

- The City of West Sacramento does not have data, as it is the only city that does not work with the District Attorney's office or HHSA to perform their decoy stings. A target for the Tobacco Prevention Program is to work with the City of West Sacramento to update their policy, as well as working with all jurisdictions on banning the sale of flavored tobacco.

3) 2019 COMMUNITY HEALTH ASSESSMENT UPDATE

- The Community Health Assessment (CHA) steers the focus of the CHIP. HHSA is collaborating with the local hospital this year to perform a single community health needs assessment, which will result in a single report. Sutter and Dignity have hired a consultant to handle parts of the assessment such as key informant interviews and focus groups, with HHSA handling the survey and providing the public health perspective.
- The consultants will be hosting several focus groups, including one specifically for Healthy Yolo participants.
- The Health Status Survey will be opened through July. It is instrumental to have individuals complete the survey to share their perspective.
- Haydee Dabritz, along with a team of interns, have been working diligently in getting the survey distributed as well as inputting and analyzing data.
- Once the survey is closed and the data has been analyzed, the consultants will begin drafting the report. The report should be near the end of the calendar year.

4) ANNOUNCEMENTS, UPDATES & NETWORKING

- Rebecca Tryon shared that HHSA now has a program on Oral Health. The team is working to create some measures around oral health care with a focus on preventive care, behaviors, and activities provided in schools. Additionally, the Oral Health team will be working on educating the dental community and decreasing sugary beverage consumption.

5) QUESTIONS AND NEXT STEPS

October 24, 2018 8:30—11:00 am

Joint meeting
