Guidance Regarding Group of COVID-19 Cases in Bryte and Broderick

WHAT IS CORONAVIRUS (COVID-19)?

Novel Coronavirus is a new virus strain spreading from person-to-person. While most people only experience mild to moderate symptoms similar to the common cold, the virus can lead to severe illness, pneumonia, and even death. While older adults are at higher risk of death, all ages can experience severe illness and hospitalization.

- Three cases were recently confirmed in the Bryte and Broderick area.
- Symptoms include fever, cough and difficulty breathing.
- Currently, there are no vaccines available to prevent coronavirus infections.

STAY AT HOME

To prevent the spread of illness, the County has issued an order to stay at home and not leave unless necessary from now until April 7.

AVOID EXPOSURE

The best way to prevent infection is to avoid being exposed to the virus

- Wash hands often with soap and water.
- Avoid touching your eyes, nose, or mouth with unwashed hands.
- Avoid contact with people who are sick and avoid close contact with others (stay six feet apart).
- Cover your mouth/nose with a tissue or sleeve when coughing or sneezing.

IF YOU FEEL SICK...

- Stay Home
- Drink fluids like water
- Get lots of rest
- Don’t go to work or attend events/gatherings
- Don’t smoke or vape.
