INTRODUCTION

OVERVIEW
The Yolo Operational Area Mass Care (ESF #6) represents an alliance of discipline-specific stakeholders who possess common interests and share a level of responsibility to provide emergency management services related to Mass Care, Emergency Assistance, Housing, and Human Services in Yolo County. Function #6 stakeholders will work together within their statutory and regulatory authorities to effectively and efficiently coordinate during all four phases of emergency management.

The Yolo County Mass Care planning group\(^1\) supports and coordinates the Operational Area’s activities of its stakeholders in the mission to protect life and property from natural and human-caused emergencies resulting from the need for government to care for its citizenry.

The Yolo Operational Area Mass Care (ESF #6) is an annex to the County of Yolo Emergency Operations Plan (EOP), City of Davis EOP, City of West Sacramento EOP, City of Winters EOP, City of Woodland EOP, and the Yocha Dehe Wintun Nation EOP. The purpose of the annex is to define the scope of function #6 and the emergency management activities of its stakeholders. The development and ongoing maintenance of function #6 will be a continuous process that will take time, resources and consensus building. Plans within the annex will be continuously maintained to reflect inclusion of additional stakeholders, the expansion of resources and capabilities, or the revision of policies and procedures.

\(^1\) See Appendix A for an overview of all planning groups within the Yolo Operational Area.
An emergency or disaster involving a Mass Care response is complex and involves many jurisdictions and agencies. It can also span several different response plans and traverse jurisdictional boundaries. Multiple plans maintained throughout the County may be used depending on the specific agent and response needed.

**PURPOSE**

The function #6 Executive Summary provides guidance to coordinate the delivery of the Operational Area’s mass care, emergency assistance, housing, and human services when local and tribal, response and recovery needs exceed their capabilities.

**SCOPE**

When requested by the Director of Emergency Services, function #6 services and programs are implemented to assist individuals and households impacted by potential or actual disaster incidents. Function #6 is organized into four primary functions:

1. **Mass Care**: Includes sheltering, feeding operations, emergency first aid, bulk distribution of emergency items, and collecting and providing information on victims to family members.

2. **Emergency Assistance**: Assistance required by individuals, families, animals and their communities to ensure that immediate needs beyond the scope of the traditional “mass care” services provided at the local level are addressed. These services include: support to evacuation (including registration and tracking of evacuees); reunification of families; provision of aid and services to people with access and functional needs; evacuation. Sheltering, and other emergency services for household pets and service animals; support to specialized shelters; support to medical shelters; nonconventional shelter management; coordination of donated goods and services; and coordination of voluntary agency assistance.
3. **Housing:** Includes housing options such as rental assistance, repair, loan assistance, replacement, factory-built housing, semi-permanent and permanent construction, referrals, identification and provision of accessible housing, and access to other sources of housing assistance. This assistance is guided by the National Disaster Housing Strategy.

4. **Human Services:** The provision of very basic supplemental services to support the personal and/or immediate recovery needs of disaster victims. Attention is focused on persons who because of age, disability, or language may need additional assistance to benefit from the mass care services described above. Effective service delivery requires coordination with non-governmental organizations and County social service agencies.

**GOALS**

The goal of function #6 is to provide safe, sanitary, secure care and shelter for all residents, including persons with access and functional needs, that reduces the health and safety impact on residents who must seek public shelter in an emergency or disaster situation.

- Prepare for and prevent, cohesively respond to, and effectively mitigate and recover from the effects of an emergency involving the care and shelter of residents.
- Integrate and standardize function #6 emergency management activities within SEMS/NIMS.
- Proactively develop and support mutual aid and other forms of assistance.
- Implement improvements to the Operational Area’s mass care and shelter response capabilities.
- Identify, coordinate, and engage the Operational Area’s emergency function #6 stakeholders.
- Train and exercise the activities of function #6.
- Provide input and planning assistance for any mass care and shelter planning within the Operational Area.

**ANNEX MAINTENANCE AND ADMINISTRATION**

Various members are responsible for the on-going maintenance and administration of function #6 plans, Field Operations Guides, Standard Operating Procedures, resource directories, exercises, etc., these are outlined in Appendix B.
STAKEHOLDERS

LEAD COORDINATORS
For the development of the Operational Area level, co-coordinators have been designated based upon authorities and responsibilities held by each coordinating agency. The Yolo County Department of Employment and Social Services and Yolo County Sheriff’s Office Animal Services Division are responsible for human and animal mass care plans, respectively. They are responsible for facilitating the development, maintenance, and implementation of function #6, with input and assistance from the stakeholders.

SUPPORTING AGENCIES AND DEPARTMENTS
Other agencies and departments assist in the development of function #6; these supporting stakeholders have responsibilities assisting in the coordination of all phases of emergency management.

### Department/Agency | Division/Group | Responsibility
--- | --- | ---
City of Winters | Administrative Services | Has primary responsibility for coordinating with the Operational Area Mass Care Coordinator on behalf of mass care response operations within the City of Winters.
City of Woodland | Community Services Department | Has primary responsibility for coordinating with the Operational Area Mass Care Coordinator on behalf of mass care response operations within the City of Woodland.
Yocha Dehe Wintun Nation | Tribal Facilities/Engineering & Cache Creek Casino Resort | Has primary responsibility for coordinating with the Operational Area Mass Care Coordinator on behalf of mass care response operations within the Yocha Dehe Wintun Nation.
University of California, Davis Campus | Student Housing Services | Has primary responsibility for coordinating with the Operational Area Mass Care Coordinator on behalf of mass care response operations on the University of California Davis Campus.

### MEETING FREQUENCY AND PROTOCOLS
The Yolo Mass Care Planning Group will meet at least bi-annually to review progress in development and maintenance of the emergency function, review and approve work products and establish priorities.

### DECISION MAKING PROCESS
All decisions of the Yolo Mass Care Planning Group are made by consensus through a simple majority vote.
**Emergency Management Community**
As described in local Emergency Operations Plans, function #6 will also involve other stakeholders such as:

- **American Red Cross, Capital Region Chapter (ARC)** – Has a congressional charter to continue and carry on a system of national and international relief.
- **Hands on Superior California (HOSC)** – Designated by the County of Sacramento and State of California to manage and coordinate disaster volunteer response.
- **Salvation Army** – Coordinates a comprehensive disaster relief services program.
- **Veterinary Emergency Response Team (VERT)** – A group of volunteer faculty, students and staff in the School of Veterinary Medicine who have an interest in emergency and disaster response.
- **Faith Based Organizations** – Organizations throughout the Yolo operational Area who work to provide mass care assistance and are affiliated with, supported by, or based on a religion or religious group.
- **Community Based Organizations** – Civil society non-profits that operate within the Yolo Operational Area and wish to provide support to the mass care system.

As the group advances, planning should include for the future participation of these and future stakeholders.

**State Agencies**
Through the CalOES Inland Regional Emergency Operations Center (REOC), access to State and Federal resources and agencies will be coordinated. This includes the many state agencies and departments, including the California Department of Social Services (CDSS), which has overall responsibility for coordinating state-level support for function #6 activities. American Red Cross (ARC) is also represented in the REOC by a liaison whose purpose is to share information between various levels of the ARC management and State government, and to follow up on ARC resource requests.

**Federal Agencies**
The National Response Framework (NRF) designates the Federal Emergency Management Agency (FEMA) as the lead or coordinating agency for ESF #6 at the federal level. Federal assistance includes support for emergency shelter, feeding, distribution of supplies, first-aid, welfare inquiry and interim housing.
CONCEPT OF OPERATIONS

This section describes the function #6 concept of operations, which documents how the emergency function stakeholders will, through collaboration and joint activities, support each phase of emergency management.

Yolo County OES will coordinate Operational Area response and recovery operations in close coordination with local, tribal, and State governments, voluntary organizations, and the private sector. Function #6 assistance is managed and coordinated at the lowest possible organizational level—e.g., the local government EOC. Only requests that cannot be filled or issues that cannot be resolved at the previously mentioned levels are elevated to the operational Area EOC and then the Inland Region REOC Mass Care and Shelter Branch EF #6 for resolution.

Each jurisdiction designates a lead agency representative for mass care that works at the direction of the Director of Emergency Services to ensure mass care services are provided to the affected population.

MITIGATION

Mitigation is the effort to reduce loss of life and property by lessening the impact of disasters. This is achieved through risk analysis, which results in information that provides a foundation for mitigation activities that reduce risk. Mitigation activities for function #6 include:

- Identify stakeholders and engage them in the development and maintenance of function #6.
- Complete a vulnerability assessment and prioritize actions to reduce vulnerabilities within the scope of function #6.
- Collaborate to pool function #6 resources to prevent hazards and reduce vulnerability (leveraging funding, resources and people).
- Develop strategies and processes to prevent or reduce the impact of events and reduce the need for mass care activities.
- Support the Yolo Operational Area Multi-jurisdictional Hazard Mitigation Plan.
- Coordinate with the Yolo County Office of Emergency Services.

PREPAREDNESS

Preparedness is a continuous cycle of planning, organizing, training, equipping, exercising, evaluating and taking corrective action in an effort to ensure effective coordination during incident response. Preparedness Activities for function #6 include:

- Develop and maintain the Yolo County Function #6 Executive Summary and plans which
comprise the function #6 annex to local Emergency Operations Plans.

- Establish decision-making and communication processes for function #6.
- Identify stakeholder roles, responsibilities and statutory authorities.
- Initiate and oversee pre-emergency planning and coordination activities.
- Conduct resource inventories, categorize resources, establish agreements for acquiring needed resources, manage information systems, and develop processes for mobilizing and demobilizing resources with the function #6 stakeholders.
- Create an Emergency Resource Directory providing the list of function #6 resources necessary to support operations.
- Plan for short-term and long-term emergency management and recovery operations.
- Integrate After Action Reports (AAR) and Corrective Action Planning (CAP) into all function #6 exercises.
- Conduct regular function #6 meetings and assist with training events.
- Support coordination for incident prioritization, critical resource allocation, integration of communications systems and information coordination.
- Create inventory agreements that are in place to support sharing of resources.

**RESPONSE**

Response includes activities that address the short term, direct effects of an incident. Response includes the execution of emergency operations plans and mitigation activities outlined to limit the loss of life, personal injury, property damage and other unfavorable outcomes. Response activities for function #6 include:

- Discipline-specific subject matter expertise for all activities within the Emergency Operations Center (EOC) organization - The function #6 coordinator provides subject matter recommendations and guidance involving its members.
- Assistance from support agencies.
- Guidance in resource request processing to EOC Sections.
- Recommendations on the appropriate use of resources.
- Expertise regarding the procedures, processes and methods for obtaining resources.
- Assistance in acquiring and processing discipline-specific intelligence and information.
- Coordination with function #6 within other EOC levels.
- Identify and document the operating modes including:
  - **Trigger Points/Thresholds** – Identifies triggers that may indicate a need to increase the operational mode.
  - **Warning Procedures** – Identifies the procedures used to support warning emergency function stakeholders of an approaching or imminent danger prior to an incident to determine the need to increase the level of the operational mode a resources available. This should also include steps taken by the emergency function to increase readiness and/or Mass Care activities.
  - **Alert and Notification** – Documents the alert and notification procedures for the emergency function when there is an increase in operational mode level.
- Documenting how stakeholders mobilize resources to support incident response and operations. This includes direct response under existing authorities or support and coordination of field-level response operations. Also document how resources will be tracked during mobilization and demobilization when no longer needed.
- Assisting with the documentation of how function #10 members communicate during an emergency, including primary and secondary systems and system redundancy.
Policies

The Yolo Operational Area model for shelter operations is integrated and inclusive. To the maximum extent feasible, people with functional needs will be sheltered with the general population and shelter staff will make efforts to provide reasonable accommodations as defined under the Americans with Disabilities Act (ADA).

The Yolo Operational Area response community recognizes the varying and special requirements of individuals that require and utilize the assistance of family members, personal assistants, and/or service animals and is committed to ensuring that the physical and mental health needs of these individuals are appropriately addressed. Individuals and assistance providers will remain together to the maximum extent possible during evacuation, transport, sheltering, or the delivery of other services. Service animals shall be treated as required by law (e.g., the Americans with Disabilities Act (ADA) of 1990).

The Yolo Operational Area response community recognizes the varying and special requirements of children and is committed to ensuring that the physical and mental health needs of children will be appropriately addressed. Children will remain with their families or caregivers to the maximum extent possible during evacuation, transport, sheltering, or the delivery of other services.

Following a large scale disaster event, there is a transition from mass care ESF #6 emergency services identified above to longer term recovery services and programs. This “recovery support” includes both government assistance and the more sustainable (i.e., ongoing) efforts that evolve from community and faith-based organizations.

RECOVERY

The aim of the recovery phase is to restore the affected area to its pre-disaster state. It differs from the response phase in its focus; recovery efforts are concerned with issues and decisions that must be made after immediate needs are addressed. Recovery activities for function #6 may include:

- Supporting recovery activities with roles and responsibilities of Emergency Function members.
- Working with other function #6 members to organize rapid needs assessment teams to prevent duplication of efforts.
- Supporting efficient activation and sufficient staffing of Local Assistance Centers with function #6 members as needed.
- Provide resources and information for the community regarding long-term housing options.
