Woodland, CA 95695
Phone (530) 666-8646 Fax (530) 669-1448
Environmental.Health@yolocounty.org

Revised July 2019
TEMPORARY FOOD FACILITY DEFINITION:
Under the California Retail Food Code (Cal Code), a temporary food facility can only operate as part of a community event. A community event means an event that is of civic, political, public or educational nature, including state and county fairs, city festivals, circuses and other public gathering events approved by the local enforcement agency.

Examples: Food and beverage sale booths commonly seen at county fairs, city festivals, craft fairs, ethnic celebrations, non-profit fund raising events, seasonal agricultural festivals, circuses, etc.

Community events are not grand opening celebrations, anniversary celebrations, or similar functions.

PUBLIC HEALTH PERMIT

PERMIT REQUIREMENT
A health permit is required in order to sell food or beverage in Yolo County (California Health and Safety Code Sections 114381-114387). Permits and inspections are necessary to insure safe and sanitary food handling and prevent food borne illnesses. Operation without a valid health permit can result in immediate closure, fee penalty, and/or citation.

PERMIT PROCEDURES
1. Review the attached Temporary Food Facility Requirements (pages 4-8). Complete the Temporary Food Facility Permit Application (pages 9-12).

2. Keep pages 1 – 8 and return the Temporary Food Facility Permit Application (Pages 9-12) with the current permit fee to the Yolo County Health Department at 292 W. Beamer Street, Woodland, CA 95695. Permits received at least 7 days before the event will qualify for a 10% discount.

PERMIT CATEGORIES:

1. Temporary Food Permit Less Than 3 Days (High Risk): For one community event that is 3 days or less in duration. The food being sold meets the definition of high risk. High risk food items are potentially hazardous foods which are foods that allow for the rapid growth of bacteria if not held at the right temperatures. Examples are raw & cooked meats, dairy products, cooked vegetables, pasta, & rice, as well as raw seed sprouts, cut melons, & cut tomatoes.

2. Temporary Food Permit Less Than 3 Days (Low Risk): For one community event that is 3 days or less in duration. The food being sold meets the definition of low risk. Low risk food items are non-potentially hazardous food items which are foods that are not required to be held at a certain temperature and do not normally allow for rapid growth of bacteria. Examples are whole fruits & vegetables, popcorn, and shaved ice.

3. Temporary Food Permit Annual (High Risk): The permit is an annual permit and is valid for 1 year and any community event in Yolo County. The food being sold meets the definition of high risk. High risk food items are potentially hazardous foods which are foods that allow for the rapid growth of bacteria if not held at the right temperatures. Examples are raw & cooked meats, dairy products, cooked vegetables, pasta, & rice, as well as raw seed sprouts, cut melons, & cut tomatoes.
4. Temporary Food Permit Annual (Low Risk): The permit is an annual permit and is valid for 1 year and any community event in Yolo County. The food being sold meets the definition of low risk. Low risk food items are non-potentially hazardous food items which are foods that are not required to be held at a certain temperature and do not normally allow for rapid growth of bacteria. Examples are whole fruits & vegetables, popcorn, and shaved ice.

5. Temporary Food Permit Annual (Low Risk): The permit is an annual permit and is valid for 1 year and any community event in Yolo County. The food being sold meets the definition of low risk. Low risk food items are non-potentially hazardous food items which are foods that are not required to be held at a certain temperature and do not normally allow for rapid growth of bacteria. Examples are whole fruits & vegetables, popcorn, and shaved ice.

NON-PROFIT FEE EXEMPTION
Non-profit organization can apply for a fee waiver for temporary food facility and event organizer permit. Non-profit organizations must complete the Affidavit For Exemption (page 11) and submit it along with proof of non-profit status such as a letter from the IRS with recognition of exemption under section 501(c) (3,4,6 or 7).

“CRAVEN ALLOWANCE” PERMIT EXEMPTIONS
A craven allowance is a permit exemption for a temporary food facility that falls under the following conditions:

1. A non-profit organization is exempted from the Temporary Food Facility Requirements and public health permits if it meets the following criteria:
   a. The booth is operated by a church, private club or non-profit organization - AND -
   b. It conducts or participates in an occasional event which occurs not more than three days in any 90-day period - AND -
   c. The occasional event is open only to the members of its organization. The public is excluded, with the exception of guests (i.e. family, friends, and other organization members).

2. A for profit entity that sells or gives food at this occasional event is exempt from permits if it meets the following criteria:
   a. Event occurs not more than three days in a 90-day period for the benefit of a nonprofit association - AND -
   b. No monetary benefit other than recognition is received

VETERANS FEE EXEMPTION
Qualifying Armed Forces Veterans are exempt from permit fees. Veterans must complete the Affidavit for Exemption (page 11) and provide a copy of honorable discharge document (DD-214).

OTHER PERMIT EXEMPTIONS
A facility that has 25 square feet or less of prepackaged, non-perishable food item is exempt with the verification of the regulating agency. In addition, the name of the booth must be noted on the Event Organizer’s vendor list.

IMPORTANT DAY OF THE EVENT REMINDERS
1. The Temporary Food Facility Self-Inspection Checklist must be filled out each day of the event and posted in the booth.

2. The Hot Holding Temperature Log for Potentially Hazardous Foods must be used by those booths that hot hold potentially hazardous foods.
TEMPORARY FOOD FACILITY REQUIREMENTS

The food booth must display the self-inspection checklist found on pages 13 & 14. The section numbers below correspond with the section numbers on the checklist.

FOOD SOURCE AND TEMPERATURE

A. Source.
1. All food must be obtained from a permitted commercial or retail food establishment.
2. When transporting food to or from the event keep food protected in containers with lids. Maintain hot and cold food temperatures when transporting.

B. Preparation.
1. All food must be prepared and stored inside the food booth or at a permitted food facility such as a restaurant, permitted church kitchen or school kitchen.
2. Food prepared and stored at home is prohibited. Exception: Non-profit organizations may sell or give away baked goods and non-potentially hazardous beverages, such as coffee, that was prepared at home.

C. Thawing. Food may be thawed in one of the four following ways:
1. In a refrigerator at a temperature of 41ºF or less.
2. Submerged in running water at a temperature of 70ºF or less and no longer than two hours.
3. In a microwave.
4. As part of the cooking process.

D. Holding Temperatures.
1. Adequate temperature controls must be provided for all Potentially Hazardous Foods (PHF). PHFs are foods that allow for the rapid growth of bacteria if not held at the right temperatures. Examples of PHF include: meat, poultry, eggs milk, soft cheese, fish, cut tomatoes, cut melons, cooked vegetables, beans, rice, potatoes, or pasta.
2. Hot foods must be maintained a temperature of at least 135ºF. All hot held foods must be destroyed at the end of the day.
3. Cold foods maintained at a temperature of 41ºF or below may be used the next day. Colds foods held at 41ºF-45ºF (for no longer than 12 hours in a 24-hour period) must be destroyed at the end of the operating day.
4. Holding temperatures must be checked at the opening of the food booth and every hour hours the food booth is in operation. The temperatures must be written down on the Holding Temperature Log.

E. Cooking Temperatures. Cook food thoroughly. Foods must be cooked to the minimal internal temperatures listed below:
1. 165ºF for 15 seconds for poultry, any stuffing containing fish, beef, pork or poultry, or stuffed fish, beef, pork, or poultry.
2. 155ºF for 15 seconds for ground fish and ground meat (hamburgers).
3. 145ºF for 15 seconds for eggs or dishes containing raw eggs, whole fish, and whole meat.

F. Reheating for Hot Holding. All previously cooked, cooled, and reheated foods must be reheated to an internal temperature of 165ºF. Examples: refried beans and fried rice.
G. **Thermometer.** Provide a metal probe thermometer with a temperature range of 0°F -200°F to check food holding and cooking temperatures.

**PERSONNEL**

A. **Health.**
1. **Do not work if you are sick!** Food handlers must be in good health. People with symptoms such as a cough, runny nose, fever, diarrhea, or feeling generally ill should not work within the foodbooth.
2. Employees with cuts or sores on their hands must wear gloves in addition to proper handwashing.

B. **Handwashing.** Handwashing facilities must be provided inside the booth. A handwashing facility must contain the following:
1. A five gallon insulated container with potable (drinkable) warm water (100°F) with a hands free dispensing valve.
2. Catch basin for waste water.
3. Soap and paper towels.
4. Wastebasket.

C. **Hygiene.**
1. Wash hands frequently. Dirty hands spread disease! All food handlers must thoroughly wash their hands and arms...paying particular attention to areas between fingers and around and under the nails. Food handlers are to wash their hands prior to food preparation, when switching between working with raw foods and working with ready-to-eat foods, prior to handling clean utensils, after using the restroom, after coughing, eating, drinking, using tobacco or other activities that contaminate the hands.
2. Wear clean clothing, clean aprons, and hair restraints.

D. **Food Preparation.**
1. Avoid touching food with bare hands. All food handlers must use disposable food service gloves, tongs, or single-use tissues when handling ready-to-eat foods.
2. Wash hands initially before putting on gloves.
3. Change gloves when changing tasks or when contaminated.

E. **Smoking.** No smoking is allowed in the foodbooth.
FOOD AND UTENSIL STORAGE AND HANDLING

A. **Hot and Cold Holding.** Must have the necessary equipment and supplies to maintain proper food temperatures. Examples are: electricity for steam tables or refrigerators, adequate ice for ice chests, or enough heating fuel for hot holding.

B. **Storage.**
   1. All food and equipment (except BBQs) shall be stored inside the food booth and at least 6 inches off the ground (see diagram of a booth layout).
   2. Bulk food items that are protected from contamination by a solid waterproof barrier may be stored on the ground. Examples: Ice chests, cases of soda.
   3. An area separate from food preparation, utensil washing, and food storage areas shall be provided for the storage of employee clothing or other personal effects.

C. **Food Storage During Multiple Day Events.** When the food booth is not in operation the food shall be stored in one of the following methods:
   1. Within the fully enclosed food booth.
   2. In sealed containers inside a permitted food facility.

D. **Customer Self-Service.** Condiments must be dispensed in single service type packaging, pump style dispensers, squeeze bottles, shakers, or other similar dispensers.

E. **Food Display.**
   1. All food shall be protected from customer handling, coughing, sneezing, and other cross contamination.
   2. All cooking and serving areas shall be protected from contamination.
   3. BBQs shall be roped off to prevent injury to the public.
   4. Food sampling shall be conducted in a sanitary manner (see Sampling Guideline).

F. **Utensil Storage.**
   1. In-use food dispensing utensils must be stored in the food with their handles above the food.
   2. Wash and sanitize all utensils before storing.
   3. Store clean utensils in a sanitary location protected from contamination.

G. **Cross Contamination.**
   1. Food must be protection from cross contamination by separating raw animal foods from ready-to-eat foods during storage, slicing, preparation, holding, and display.
   2. Provide separate cutting boards, knives, and disposable gloves for the handling of raw meats, poultry, or seafood.

H. **Ice:** Ice used for refrigeration cannot be used for consumption because it might become contaminated. A separate compartment or ice chest is needed for beverage ice.

CLEANING

A. **Warewashing.** Food booths that handle unpackaged or opened foods and beverages must provide a warewashing facility:
   1. Provide three containers. One shall contain soap and warm water for washing, one shall contain warm water for rinsing, and one shall contain a sanitizing solution for sanitizing.
   2. For the sanitizing solution use approved sanitizing tablets or use bleach at 1 tablespoon per gallon of rinsing water. Sanitizing kills the bacteria and viruses that soap and water do not removed. Use test strips to check sanitizing solution concentration.
3. For events lasting more than 3 days a three-compartment sink with hot and cold plumbed water and with waste drainage to a sanitary sewer or holding tank will be required.
4. A centrally located warewashing facility may be shared by no more than 4 adjacent food booths.

**WATER SUPPLY AND WASTEWATER DISPOSAL**

**A. Water.**
1. An adequate supply of warm and cold potable water shall be available on site for cooking, cleaning, sanitizing, handwashing, and drinking.
2. Potable water includes bottled water, water from an approved public water supply, and water from an approved private water supply.
3. Potable water supply hoses must meet food grade materials (standard garden hoses are prohibited).

**B. Wastewater Disposal.** Wastewater must be disposed in an approved wastewater disposal system such as a sink or toilet. Wastewater may not be dumped on the ground surface, into waterways, or into stormdrains.

**PREMISES**

**A. Garbage.** Must provide leak-proof and insect-proof garbage bags within a plastic container.

**B. Waste Grease.** Waste grease shall be disposed of into a serviceable tallow bin or in another approved manner.

**C. Lighting.** Adequate lighting shall be provided.

**D. Animals.** No live animals are permitted in or within 20 feet of the food booth. Exception: Service animals may be within the 20 feet but are not allowed in the food booth.

**FOOD BOOTH**

**A. Identification.** Facility name, operator name, city, state, and zip code shall be posted in a location clearly visible to patrons. The facility name must be in letters at least 3 inches high and shall be of a color contrasting with the food booth. Letters and numbers for the city, state, zip code and name of operator shall not be less than 1 inch in height. Must display health permit.

**B. Tables, Counters, and Shelves.** Table, counters, food preparation surfaces, and shelves shall be smooth, easily cleanable, and non-absorbent.
C. **Enclosure.** The preparation of food that involves cutting, chopping, mixing, assembling, or cooking must be done inside a fully enclosed booth. This is essential to prevent contamination of food and food contact surfaces by dust, flies, and overhead contamination. An acceptable booth consists of the following:
1. Four fly-proof screened sides such as canvas, plywood, or fine-mesh fly screening (at least 16 mesh).
2. A water repellent roof. Screening shall only be acceptable as a ceiling above cooking equipment when necessary for ventilation.
3. Fly-proof pass-thru openings.
4. Non-combustible construction materials, as required by the Fire Department.

![Enclosure Diagram]

**Note:** The only operations not requiring fully enclosed booths are those which are approved for limited food preparation*, sell beverages from approved dispensers, or food items prepackaged by wholesaler or at an approved off-site kitchen. Vendors that distribute samples may be required to have a fully enclosed booth.

*See Temporary Food Facility Limited Food Preparation Guidelines for more information.

D. **Floor.** Cleanable floor surfaces must be provided for all booths. Grass or dirt must be covered with a cleanable material such as a tarp or ply-wood. A concrete or asphalt surface is approved without additional coverings.

E. **Access Doors and Pass-thru Windows.** Tight-fitting closures for access door openings are required. Pass-thru windows are closeable and not larger than 18”x12”.

**TOILET FACILITIES**
At least one toilet facility for each 15 booth employees shall be provided within 200 feet of each food booth. Each toilet facility shall be provided with approved handwashing facilities and supplies.

**OPEN-AIR BBQ EQUIPMENT**
Open-air BBQ’s may be operated in conjunction with a permitted fully enclosed food booth. The BBQ must be used for cooking, roasting, or broiling over live coals (wood, charcoal or gas heated). The BBQ may not be used for warming goods or maintaining food temperatures in pots, flat grilles, or other containers.
TEMPORARY FOOD FACILITY PERMIT APPLICATION

Please submit application fourteen (14) calendar days before the event to allow for processing. To encourage early processing, a 10% discount will be given to those who submit at least seven (7) calendar days before an event.

BOOTH DRAWING

All booth vendors shall complete this section including those selling or serving prepackaged food.

In the space below provide a drawing of your booth. Identify and describe all equipment, including cooking and holding equipment, handwashing facilities, work tables, utensil washing sink (containers), food and paper product storage, garbage containers, and customer service areas (see sample below).

*Cooking equipment allowed outside but adjacent to booth: Open air BBQ and cooler for storage of raw meat at the grill, large open flame equipment using propane tanks

*Cooking equipment allowed outside but adjacent to booth with overhead protection: deep fryer, flat grill, wok
**TEMPORARY FOOD FACILITY (TFF) SELF-INSPECTION CHECKLIST**

*This checklist is to be completed and posted inside the booth during operation*

Hot foods must be held at a minimum temperature of 135°F. If the temperature drops below 135°F for a short period of time food must be reheated to 165°F for 15 seconds, then maintained at 135°F or above. If product is below 135°F for 4 hours or more, the food must be destroyed. Record any of these actions in the corrective action column above.

Potentially Hazardous Foods (PHFs) are foods that allow rapid growth of bacteria if not held at the right temperatures. They include any foods of animal origin, cooked rice, cooked pasta, cooked beans, cooked vegetables, sprouts, cut tomatoes, and cut melons.
Avoid Foodborne Illness-Avoid the Danger Zone: Bacteria will grow very quickly on foods held in the danger zone. The danger zone is above 41ºF and below 135ºF. Bacteria on foods can cause illness or death. Protect your customers by checking food temperatures often.

**Minimum Cooking Temperatures of Food (internal temperatures)**

Use a probe thermometer to check food temperatures

**Reheating Temperature for PHFs:** 165º F

**Hot Holding Temperature for PHFs:** 135º F

**Cold Holding Temperature for PHFs:** 41º F*

*During operating hours of a Temporary Food Facility, a serving line, or a salad bar PHFs may be held at a temperature not to exceed 45º F for up to 12 hours in any 24-hour period. At the end of the operating day any PHFs held at 45º F must be discarded.

*Raw shell eggs, unshucked live molluscan shellfish, pasteurized milk and pasteurized milk products in original sealed containers, and PHFs held for sampling at Certified Farmers’ Markets may be cold held at 45º F.
