**INTRODUCTION**

**OVERVIEW**

The *Information and Planning Annex (ESF #5)* represents an alliance of discipline-specific stakeholders who possess common interests and share a level of responsibility to provide a common operating picture and planning platform within the Yolo Operational Area. The function #5 stakeholders will work together within their statutory and regulatory authorities to effectively and efficiently coordinate during all four phases of emergency management.

Function #5 is designated to support Operational Area emergency management activities for any event requiring multi-agency planning and coordination. Function #5 activities include alert and notification, EOC activation and staffing, emergency management planning, resource allocation, and financial management. Under function #5, trained and experienced staff fills management positions in the Planning, Operations, Logistics, and Finance/Administration Sections of the EOC jurisdictional EOCs.

The jurisdictionally designated OES Coordinators are the coordinating departments for function #5, and have ultimate responsibility to oversee function #5 activities. Upon EOC activation, they may request representatives from other departments to fill relevant function #5 positions in accordance with the needs of the event.

The *Information and Planning Annex (ESF #5)* is an annex to the County of Yolo Emergency Operations Plan (EOP), City of Davis EOP, City of West Sacramento EOP, City of Winters EOP, City of Woodland EOP, and the Yocha Dehe Wintun Nation EOP. The purpose of the annex is to define the scope of function #5...
and the activities of its stakeholders. The development of function #5 will be a continuous process that will take time, resources and consensus building. Plans within the annex will be maintained to reflect inclusion of additional stakeholders, the expansion of resources and capabilities, or the revision of policies and procedures.

**PURPOSE**

Function #5 is responsible for collecting, analyzing, processing, and disseminating information about a potential or actual incident and conducting planning activities to facilitate the overall activities in providing assistance to the whole community. Additionally, Function #5 is responsible for supporting overall emergency management activities of the Cities, County, Operational Area and Tribe during a significant incident, emergency, disaster or planned event that exceeds the capacity of normal response operations. During such circumstance, function #5 will provide core management and administrative functions in support of the Emergency Operations Center (EOC) and associated departmental and field operations.

**SCOPE**

Function #5: Information and Planning serves as the coordinating function for overall emergency management activities prior to and immediately following a major event within the Operational Area. This function encompasses EOC support and planning functions during post-event response. When activated, function #5 activities may include the following:

- Coordinate support activities required to prepare for or respond to a major event, to include information collection, analysis, operations support, planning, requests for
assistance, resource management, deployment and staffing, mutual aid, facilities management, and financial management.

- Maintain communication and coordination between the all jurisdictional EOC Sections and Branches, Policy Group, Department Operations Centers (DOCs), the Regional Emergency Operations Center (REOC), and other Operational Area EOCs and/or Federal partners who establish a direct relationship with jurisdictional EOCs.

- Facilitate receipt of management policies and direction from the Policy Group; communicate policy/direction to EOC Sections/Branches.

The plans that make-up the function #5 Annex may be activated in whole or in part as described in the local Emergency Operations Plans and/or in response to a request for support when responding under:

- Chapter 9 Emergency Organization and Functions of the City of Davis, Municipal Code
- Chapter 2.40 Emergency Organization and Functions of the City of West Sacramento, Municipal Code
- Chapter 2.56 Disaster and Emergency Organization of the City of Winters, Municipal Code
- Chapter 8 Emergency Services of the City of Woodland, Municipal Code
- TC-07-17-12-19 of the Yocha Dehe Wintun Nation, Code of Ordinances
- Title 4, Chapter 1 – Emergency Services of the County of Yolo, Code of Ordinances

**GOALS**

This section identifies the goals for the Yolo Operational Area Emergency Management partners to support the further development and ongoing maintenance of emergency support function #5 over the coming years.

- Conducts operational planning, coordinating with other OA agencies at both the county and local levels.

- Activates and convenes OA emergency assets and capabilities to prevent and respond to incidents that may require a coordinated response, and coordinates with State, local and tribal emergency management organizations.

- Coordinates preparedness, response, recovery, and mitigation planning activities including incident action, current, and future operations planning.

- Assists in the overall staffing of emergency management activities at emergency operations centers, including which functions are activated, the size and composition of the organizational structure, the level of staffing at the above facilities, and the key personnel required.
ANNEX MAINTENANCE AND ADMINISTRATION
Various members are responsible for the on-going maintenance and administration of function #5 plans, Field Operations Guides, Standard Operating Procedures, resource directories, exercises, etc., these are outlined in Appendix B.
LEAD COORDINATORS
For the development of the Operational Area level a lead agency has been designated based upon authorities and responsibilities. The lead agency is responsible to facilitate the development, maintenance, and implementation of function #5, with input and assistance from the stakeholders. For the purposes of function #5, the lead agency is the Yolo Operational Area Joint Emergency Management Services (JEMS) Group which includes:

- City of Davis
- City of Winters
- Yocha Dehe Wintun Nation
- Yolo County Housing
- City of West Sacramento
- City of Woodland
- Yolo County

SUPPORTING AGENCIES AND DEPARTMENTS
Other agencies and departments that play roles in both regulatory and response operations assist in the development of function #5. These supporting stakeholders have responsibilities in assisting the coordination of all phases of emergency management.

**Meeting Frequency and Protocols**

JEMS – Partners provide representatives to participate in quarterly meetings for the purposes of program direction and review of projects. Emergency Services Directors (identified by Ordinance/Code) are provided with bi-annual updates regarding the program.

OACG – Partners meet every other month to review opportunities for the advancement of emergency planning and response as well as share independent planning efforts undertaken by any department, agency, or Emergency Support Function.

**Decision Making Process**

All decisions of both groups are made by consensus; through a simple majority vote.

**Emergency Management Community**

As described in local Emergency Operations Plans, function #5 will also involve other stakeholders such as:

- California Office of Emergency Services, Inland Region Representatives – Serves as the Regional emergency planning and response point for the Yolo Operational Area.
- California Office of Emergency Services Office of Intergovernmental Tribal Affairs – Works to improve and maintain communication and collaboration between CalOES and all Native American Tribes in California.
- The Region IV Mutual Aid Regional Advisory Committee (MARAC) – Provides a broad base for local government participation and is a principal source of input and information in the California Standardized Emergency Management System.
- Delta Working Group (DWG) – A combination of Counties and response partners who have primary responsibility for flood response within the Sacramento Delta.
- California Emergency Services Association (CESA) – Is an organization dedicated to the
promotion of mutual support and cooperation across disciplines in preparing for natural and human caused disasters and public emergencies.

- California Operational Area Coalition (COAC) – Acts as a forum for information exchange and advocacy on emergency management issues specific to California’s 58 Operational Areas.

- Standardized Emergency Management System (SEMS) Advisory Board – Oversees the process for supporting the ongoing improvement and maintenance of California’s overall system for emergency management.

- California State Association of Counties (CSAC) – Represents county government before the California Legislature, administrative agencies and the federal government.

As the groups advance, planning should include for the future participation of these and future stakeholders.

**STATE AGENCIES**

The role of the State Agencies will be dependent upon the specific nature of the emergency including the type of hazard being addressed and the scope of the response and recovery activities. Supporting State Agencies are those who can provide technical, policy, and subject matter expertise, and are generally requested by stakeholder agencies or the Lead Coordinator(s) during an incident.

**FEDERAL AGENCIES**

The National Response Framework (NRF) organizes federal resources and capabilities under 15 Emergency Support Functions (ESF). ESFs have been developed and organized for the purpose of providing federally controlled resources to state and federal agencies during the response and recovery phases of a disaster or large scale emergency.
CONCEPT OF OPERATIONS

This section describes the function #5 concept of operations, which documents how the emergency function stakeholders will, through collaboration and joint activities, support each phase of emergency management.

PLANNING ASSUMPTIONS

The following planning assumptions for function #5: Information & Planning apply:

- During an emergency situation that exceeds normal capacity, there is a need for a central collection point at the Emergency Operations Center (EOC) where situation information can be compiled, analyzed, and prioritized.
- EOC activities are not intended to manage incident level operations, but rather to provide overall support and coordination to emergency management.
- There is an immediate and continuous need for officials involved in response and recovery efforts to receive information about the developing or ongoing emergency situation.
- The jurisdictional Emergency Services Director or their designee has ultimate responsibility of overall emergency management efforts during an emergency situation. With support from the Policy Group. The Director will issue policy guidance and provide overall supervision of jurisdictional operations.
- EOC activities may require 24-hour operations.
- During an event, resource management and coordination may be initially performed at the Departmental Operations Center level (if one exists). When internal resources have been exhausted, requests are submitted by the DOC to its representative in the EOC.

MITIGATION

Mitigation is the effort to reduce loss of life and property by lessening the impact of disasters. This is achieved through risk analysis, which results in information that provides a foundation for mitigation activities that reduce risk. Mitigation activities for function #5 include:

- Identify stakeholders and engage them in the development and maintenance of function #5 at least annually.
- Complete a vulnerability assessment and prioritize actions to reduce vulnerabilities within the scope of function #5 through the current Hazard Mitigation Plan.
- Collaborate to pool function #5 resources to prevent hazards and reduce vulnerability (leveraging funding, resources and people).
- Continue to develop strategies and processes to prevent or reduce the impact of events and reduce the need for response activities.
- Support the Yolo Operational Area Multi-jurisdictional Hazard Mitigation Plan.
- Coordinate with the Yolo County Office of Emergency Services.
PREPAREDNESS

Preparedness is a continuous cycle of planning, organizing, training, equipping, exercising, evaluating and taking corrective action in an effort to ensure effective coordination during incident response. Preparedness Activities for function #5 include:

- Develop and maintain the Yolo County Function #5 Executive Summary and plans which comprise the function #5 annex to local Emergency Operations Plans.
- Establish decision-making and communication processes for function #5.
- Identify stakeholder roles, responsibilities and statutory authorities.
- Initiate and oversee pre-emergency planning and coordination activities.
- Conduct resource inventories, categorize resources, establish agreements for acquiring needed resources, manage information systems, and develop processes for mobilizing and demobilizing resources with the function #5 stakeholders.
- Plan for short-term and long-term emergency management and recovery operations.
- Integrate After Action Reports (AAR) and Corrective Action Planning (CAP) into all function #5 exercises.
- Conduct regular function #5 meetings and assist with training events.
- Support coordination for incident prioritization, critical resource allocation, integration of communications systems and information coordination.
- Begin to identify and document resource types for function #5.
- Create an Emergency Resource Directory providing the list of function #5 resources necessary to support operations.
- Create inventory agreements that are in place to support sharing of resources.

RESPONSE

Response includes activities that address the direct mitigation efforts of an incident. Response includes the execution of emergency operations plans and mitigation activities outlined to limit the loss of life, personal injury, property damage and other unfavorable outcomes. Response activities for function #5 include:

- Discipline-specific subject matter expertise for all activities within the Emergency Operations Center (EOC) organization - The function #5 coordinator provides subject matter recommendations and guidance involving its members.
- Assistance from support agencies.
- Guidance in resource request processing to EOC Sections.
- Recommendations on the appropriate use of resources.
- Expertise regarding the procedures, processes and methods for obtaining resources.
- Assistance in acquiring and processing discipline-specific intelligence and information.
- Coordination with function #5 within other EOC levels.
- Provide linkage to discipline specific Multi Area Coordination (MAC) Groups and provide:
Information and Planning

Executive Summary  Revised May 2016

- Collection of intelligence and information regarding the emergency to assist in setting priorities and objectives.
- Detailed information on scarce resources, resource allocation and inventory.
- Recommendations during the development of AARs.

- Identify and document the operating modes including:
  - **Trigger Points/Thresholds** – Identifies triggers that may indicate a need to increase the operational mode.
  - **Warning Procedures** – Identifies the procedures used to support warning emergency function stakeholders of an approaching or imminent danger prior to an incident to determine the need to increase the level of the operational mode. This should also include steps taken by the emergency function to increase readiness or to save lives and protect property prior to an incident.
  - **Alert and Notification** – Documents the alert and notification procedures for the emergency function when there is an increase in operational mode level.

- Documenting how stakeholders mobilize resources to support incident response and operations. This includes direct response under existing authorities or support and coordination of field-level response operations. Also document how resources will be tracked during mobilization and demobilization when no longer needed.

- Documenting how function #5 organizes itself to support the emergency response within SEMS levels consistent with the Multi Agency Coordination System (MACS). Also documents how the emergency function will support the maintenance of the MACS.

- Assisting with the documentation of how function #5 members communicate during an emergency, including primary and secondary systems and system redundancy.

RECOVERY

The aim of the recovery phase is to restore the affected area to its pre-disaster state. It differs from the response phase in its focus; recovery efforts are concerned with issues and decisions that must be made after immediate needs are addressed. Recovery activities for function #5 may include:

- Supporting recovery activities with roles and responsibilities of function #5 members.
- Working with other function #5 stakeholders to prevent duplication of efforts.
