

## NORTH DAVIS MEADOWS WATER PROJECT UPDATE

June 2016

### Previously:

1. The Yolo County Board of Supervisors held our County Service Area's Proposition 218 hearing and approved the fee increase, on May 31, 2016. This fee increase will be used to guarantee a **Planning Loan** from the State to obtain an Engineer's Report. The Engineer's Report will set forth plans and specifications with detailed information and drawings for construction of the new domestic water system with water from the City of Davis. Our existing wells will continue to provide non-domestic water (irrigation/exterior).

The Engineer's Report will detail the construction expenses involved in our project. A second Proposition 218 hearing will be held in the fall to raise funds for the construction phase of our project.

2. Our Engineer's Report will include an estimate for running a conduit for internet wiring/cable.

### What's new:

1. North Davis Meadows' Planning Loan application was submitted to the state at the beginning of June. A NOE (Notice of Exemption), the environmental component necessary for our Planning Loan, was also submitted.
2. A "Will Serve" letter from the City of Davis was received.

### Next Steps:

1. Regina Espinoza will finalize contracts for the Engineer's Report.
2. Regina will begin working with Davis City staff, on a Water Service Agreement between the City and North Davis Meadows customers.
3. At our CSA meeting on June 14<sup>th</sup>, Yashavant Kulkarni and Davis Campbell volunteered to be on a committee to investigate how high speed internet can be provided to NDM, using the proposed conduits.
