October 11, 2017

Dear North Davis Meadows Residents,

Last month, you received information from us about the need to reconsider the solution to North Davis Meadows' water quality issues given concerns about adequate fire protection. This correspondence included an invitation to take a survey on three different paths forward. The survey was completed by a majority of households in the community with the majority of respondents favoring Scenario 2 – connecting to the City of Davis for all water uses. An analysis of the results is attached.

Next steps in the process are to initiate the additional engineering required for Scenario 2, conclude the rate study, conduct Proposition 218 proceedings, apply for a State Revolving Fund loan and finally, proceed to construction. A timeline of this effort, including additional community meetings, will be shared as soon as these phases are further defined.

During the survey, there was robust community conversation about the scenarios presented and other options that may be available. To the best of our abilities, all inquiries were considered and the Frequently Asked Questions were updated online accordingly. We will continue to make further updates as additional inquiries are made. Meanwhile, we encourage those interested in this project, and other North Davis Meadows CSA initiatives, to consider applying to be on the Advisory Committee to help us provide you with appropriate and cost-effective services.

For more information on the Water Connection Project, how to apply to be on the Advisory Committee or other CSA business, please visit: [www.YoloCounty.org/North-Davis-Meadows-CSA](http://www.YoloCounty.org/North-Davis-Meadows-CSA), call the County Service Areas Administrative Support Team at (530) 666-8153, or contact any one of us via the e-mail addresses provided below.

Best regards,

Yolo County Supervisor Don Saylor

# North Davis Meadows Water Project Survey Results (62 total responses)

Monday, October 09, 2017

## Scenario 1

Current Plan per 2015 Survey  
Dual-Use System with  
Fire Protection from Existing Wells

## Scenario 2

Fire Chief Recommended

All Uses on City Water

## Scenario 3

Minimum Fire Chief Recommended  
Dual-Use System with  
Fire Protection from City Water

# Q1: Which options would you consider an acceptable solution?

Answered: 53 Skipped: 9

## Notes:

- Based on comments within the 9 surveys taken in which a scenario was not chosen: 4 were opposed to all options/wanted to do nothing; 4 were in support of a Point of Use option; and 1 was in support of a 4<sup>th</sup> scenario not described.
- Doing nothing about the drinking water in NDM is not an option and may result in fines of \$3,000/day.
- A Point of Use scenario has been determined by the State to not be an option for the North Davis Meadows community.

| ANSWER CHOICES        | RESPONSES |
|-----------------------|-----------|
| Scenario 1            | 16.98% 9  |
| Scenario 2            | 94.34% 50 |
| Scenario 3            | 16.98% 9  |
| Total Respondents: 53 |           |

**Q2: Please rank your acceptable options with 1 being your preferred choice and three being your least favored option.**

Answered: 52 Skipped: 10

|            | 1            | 2           | 3           | TOTAL | SCORE |
|------------|--------------|-------------|-------------|-------|-------|
| Scenario 1 | 37.50%<br>3  | 62.50%<br>5 | 0.00%<br>0  | 8     | 2.38  |
| Scenario 2 | 93.88%<br>46 | 2.04%<br>1  | 4.08%<br>2  | 49    | 2.90  |
| Scenario 3 | 37.50%<br>3  | 37.50%<br>3 | 25.00%<br>2 | 8     | 2.13  |

**Note:** one survey taken chose all three scenarios but did not rank them, hence the discrepancy between 53 answers on scenarios chosen (previous page) and 52 answers on scenarios ranked (above).
