MEMORANDUM

To: File
From: Thomas F. Tracy, Assistant Director
       Public Works and Transportation
Subject: CSA #11, Dunnigan Streetlights
Date: May 6, 1991

Today I spoke with Randy Descombaz, 458-2913, of PG&E in Colusa. He is the Electrical Engineer in the PG&E district serving Dunnigan. He works with Bob Woodring, the New Business Representative. Their address is 321 Fifth Street, Colusa, CA 95422.

The procedure for street light installation is:

1. We prepare a map of desired locations.
2. We arrange with Bob for a field review.
3. Randy and Bob decide what needs to be installed at each location, and Bob prepares a preliminary estimate.
4. PG&E installs the lights.

The estimate can be completed within a week of the field review. The lights can usually be installed with six weeks of the field review.

Subject: Dunnigan Street Lights

Dear Mr. Woodring:

Thank you for performing the field review of the proposed street light locations in Dunnigan on May 22.

On June 3, 1991, the Dunnigan County Service Area Advisory Committee approved the street light locations as shown on the attached plan "Approved Street Light Locations" dated June 3, 1991. There are a total of 35 light locations shown, the 33 you reviewed and two others on existing poles. The additional locations are on C.R. 5 just west of C.R. 99W, and on C.R. 89A north of Main Street, opposite the Town Hall. The Committee also recommended that light guards be installed at five locations, identified with the letter "G" on the Map.

The Committee approved the Annual Assessment Fee for 1991/92. This Assessment Fee must be confirmed by the County Board of Supervisors, and we anticipate this will occur around the end of July, 1991.

When the Board confirms the Assessment Fee, I will notify you that installation can begin. Please do no installation prior to notification, but hopefully you can begin scheduled work starting in August, based on the attached plan.
