### Electric Vehicle Service Equipment (EVCE) Checklist

This checklist ensures compliance with AB 1236. To expedite permitting for EVCE please complete this checklist which summarizes the technical aspects of EVSE installations. This checklist may be submitted in person or by email at building.division@yolocounty.org.

Upon this checklist being deemed complete, a permit shall be issued to the applicant. However, if it is determined that the installation might have a specific adverse impact on public health or safety, additional verification will be required before a permit can be issued. This checklist substantially follows the “Plug-In Electric Vehicle Infrastructure Permitting Checklist” contained in the Governor’s Office of Planning and Research “Zero Emission Vehicles in California: Community Readiness Guidebook” and is purposed to augment the guidebook’s checklist.

**Attach a completed building permit application.**
